PROJECTS

WhatsApp Web API Gateway (Node.js + Express)

github.com/yan043/whatsapp-api

- Supports multiple WhatsApp sessions within a single dashboard.
- Fast and secure login via QR Code, similar to WhatsApp Web.
- Enables sending of text, images, documents, and broadcasts via RESTful API.
- Easily integrated with a clean and intuitive web interface.

DokCik – Document Automation App (Laravel 11 + MySQL)

github.com/yan043/apps_dokcik

- Automates the generation of Word and Excel documents dynamically.
- Flexible template system customizable to user needs.
- Seamlessly integrated via REST API for cross-system compatibility.
- Lightweight admin panel for fast and user-friendly management.

Lentera – Field Service Management System (Laravel 11 + MySQL)

github.com/yan043/apps_lentera

- Simplifies order distribution and real-time technician monitoring.
- Complete features including technician dashboard, location tracking, and attendance.
- Supports inventory control and automated performance reporting.
- Structured interface to assist operations and helpdesk workflows effectively.
